

# Door Restore Express - Clear Coat System

The Easiest Way to Restore Your Doors Color & Shine!

**Door Restore Express** is an easy to use acrylic clear coating that restores shine and color to old doors making them look "Brand New" again!

- Easy 'no fuss' application suitable for 'do-it-yourselfers' and professional contractors
- Dries in 15 minutes or less
- Reapply as needed to maintain color and shine
- Economical with a low per door material cost
- Available in aerosol spray cans or 1 and 5 gallon cans

This product is designed to be applied as a routine maintenance coating every 3 - 8 years.\* Simply reapply while the existing clear coat is still intact to avoid degradation of your color coat and the need to then scrub off layers of chalk or even repaint.

\*The durability of your clear coat depends on many factors including sun and weather exposure, location, the underlying door color (dark colors absorb more UV radiation which accelerates coating breakdown) and the thickness of the applied clear coat.

**Trial Kits Are Available**
